Description	Estimate	Cost
Job Description: Washing machine fault Instruction Notes: Electrolux "I did a round of laundry yesterday as every Sunday, but at the end of the cycle the door of the washing machine could not open. I tried to re-set by doing a second washing cycle but after the second cycle, the door could still not open. It also looks like there is water still in, I ran the Drain cycle but it's not working. There is currently wet laundry in the machine, the machine is turned off, but the door is still stuck with water inside, not draining."	£0.00	£0.00
