Instruction:	Please assess and report back, the tenant has reported the following: Our washer/dryer started malfunctioning. Instead of drying it washed and when I tried to put it on a dry cycle again the machine made weird noises and all lights were flashing on the console. It won't allow me to open the machine to retrieve the wash. I've switched it off at the mains in case there is an electrical fault although it is more likely to be the motor/filter based on the noise.
