London, SW15 2BP

**Instructed By:** Minneaux Schandorf

**Date:** 28/09/2023

**Works ref:** W515595

**Purchase order:** 1586891

**Supplier a/c no:** C512358

<b>Instruction:</b>	The dishwasher was about half way through a wash cycle when it tripped the electrical breaker. On closer inspection, there is a fair amount of water (I estimate around 3-5 litres) that has leaked out from the bottom of the dishwasher. This water seems to have seeped into the concrete slab below it. and into the basement. Dishwasher switches on but does not start a wash cycle (will start beeping non-stop after 4mins) .I've checked the filter, dishwasher base, salt container & inlet / outlet pipes for any blockages & cant find anything.I've turned the dishwasher off along with the water supply valve connected to it to prevent any further water damage.[Appliance type: Dishwasher] [Appliance make: Baumatic] [Appliance model: BDI 1L38S] [Appliance S/N: TBC] [Number of floors: 3] Please contact me (Tristan) for availability dates so we can arrange access.Pet information - NoneParking restrictions - Can arrange temporary parking for plumbers van in basementNote: The tenant would like to be present when the work is carried out.
