Instruction:	Please can you attend to the following reported by the tenant: The water in the fridge does not drain properly. A thick ice cover has emerged that covers the drain completely. This causes water standing at the bottom of the fridge. The fridge is on a "4" setting so not even close the max of "6". And we've been using it only for a couple of days now since we moved in. I tried to remove that ice cover but stopped due to the risk of damaging the surface even more.
