Instruction:	Please attend and investigate - do not repair until you have the approval, please first send us report and if needs to be replaced, send us all the information about the washing machine as the LL wants to check the prices online. Washing machine - When the tenants took their washing out yesterday there were bits of white/grey plastic in the clothes and in the seal. When they tried to use dryer there is loud rumble on each rotation of the drum - they turned it off straight away to avoid any damage but it seems like the drum isn't rotating properly and making that loud noise. It's not done this before and it seems the plastic has come from the washer/dryer itself perhaps what helps it rotate smoothly?
