<b>Instruction:</b>	Please attend: The oven is somehow getting hot on its own despite being turned off. It seems to be on at a very low heat and no matter what they do, they cannot get the oven to turn off or the light to turn off. This is particularly strange because they don't use this oven for anything other than to store baking sheets and a pan. It's making the kitchen quite warm and likely fairly expensive for them to have an oven on all day.
