Instruction:	Belling Oven - The Tenant has reported a fault with the oven - It is the lower/big oven which can be switched on but it does not heat up so it looks like it's working after turning it on but the oven is cold all the time. The top oven, as well as a cooker, works well - so it is just a low bigger oven which does not work. Hope it makes sense. The top oven is too small to bake anything "more serious" so it will be great if we can have it fixed.
