Instruction:	Tenant has reported fault with washing machine, please kindly attend to investigate - report from TT: Unfortunately, the drum of the washing machine appears to be broken, and it is affecting its functionality. There is an unusual noise, as you will hear in the video attached. Also, the washing machine makes a squeaking noise as if it is trying to spin the clothes at times but the drum remains in the same position, meaning the clothes are not being spun around as they should be.
